

High Voltage RF/Microwave Switch Drivers:

- Large portfolio of PIN Diode and FET Drivers (GaN, GaAs, Si,....).
- Translate Logic (3.3V/5V) to Control Voltage (-400V to +600V).
- Fastest switching speeds available.
- Many package options for a wide range of applications.
- Custom drivers: Designed and manufactured to your spec's.

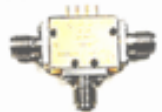

Voltage Multipliers/Level Shifters/Charge Pumps:

- Boost your supply voltages where needed.
- Reduce the complexity, layers and cost of PCB's.
- Save valuable board space by integrating into small packages.
- Custom designs to meet your specific needs.

RF/Microwave Switches:

- High performance Hermetic Chip and Wire assembly.
- Connectorized Switches for rugged environments.
- Wide frequency ranges available.

Custom Surface Mount modules:

- High performance Hermetic Chip & Wire modules.
- Plastic Encapsulated Modules improve reliability & save space.
- Replace obsolete components and sustain legacy products.
- Reduce cost of complex multi-layer PBC's.
